

Southern Africa's reliable transporters-COLEMAN TRANSPORT

Since early practices, the mining industry has played a pivotal role in the escalation of various key sectors pertaining to this industry globally. One such industry that has seen major changes is that of transportation.

In recent years, growing demand for reliable transporters of goods till the point of warehousing service providers has driven success among national and multinational mining companies in Southern Africa. Such is in the case of Coleman Transport.

With over 25 years of experience in transport and logistic service provision between South Africa and Namibia, Coleman Transport is facilitating to expand tailor-made yet high-quality services that aid mines with continued operations with minimal downtime.

Since its inception, Coleman Transport has matured into the preferred road cargo transport and logistics solution

provider for several mining companies in Namibia as well as other industries in need of inward transport of necessary consumables.

Coleman Transport is a privately-owned company that is AA compliant in Namibia. Besides having headquarters in Windhoek of Namibia, the company has depots in Gauteng, Rosh Pinah, Springbok, Tsumeb, Walvis Bay and Cape Town.

The company offers a wide range of services such as receiving and dispatching of goods, material handling, transportation of bulk fuel, HFO and HEF transportation. It also specializes in clearing and forwarding, breakbulk, explosives and hazardous goods transportation, reagents and many more just to mention a few.

With several projects being undertaken by Coleman Transport, these include a tender won to supply and transport 30 000tons of steam coal to Nampower's Power Station in Windhoek. To complete

the Arandis Warehouse to store 60 000tons of Sulphur, mining reagents and repairs for both import and export. This storage will also be useful for Sulphur storing in transit to Zambia / Democratic Republic of Congo.

Some mining transport contracts between Namibia and South Africa include Swakop Uranium Mine to transport contracts for consolidated transport, sulphur and Re-agents. Trevali/RPZC Mine for outbound transport of zinc and lead concentrates for the past 10 years. Vedanta - Black Mountain Mine / Gamsberg for the transportation of range from Lime Bulk Tankers to Tipper loads and Consolidation loads.

The ultimate goal for Coleman Transport is to earn the lifetime loyalty of customers by offering affordable, one-stop logistical, transportation and warehouse services that exceed customer expectations and offer excellent value.
